

Initiatives to Provide Humanitarian Aid to Ukraine

NIPRO CORPORATION (Head Office: Kita Ward, Osaka; President: Yoshihiko Sano), with the goal of providing humanitarian aid and emergency assistance to those who are suffering in Ukraine and to those who have evacuated to nearby countries, has made a donation, through the Japanese Red Cross Society, of 10 million yen and, through the Ukrainian Embassy, of free medical devices and the like.

At NIPRO, our goal is to become a “truly global comprehensive medical manufacturer” that is able to respond to a wide variety of medical needs, for the good of all kinds of people around the world, without regard to our differences, be they in culture, customs, ways of life, age, or other aspects. Under this basic policy, we will continue to provide aid to those on the medical front line, and we would like to express our sincere hope that the people of Ukraine can return to healthy, safe, and peaceful lives as soon as possible.
