

Notice Regarding Unauthorized Access to NIPRO Subsidiary in China

Nipro Medical (Hefei) CO., LTD. (NMH; Chairman: Katsunori Shimada)—a NIPRO CORPORATION subsidiary in China—was subject to unauthorized access from an outside party on February 9, 2023 (local time). As a result of this unauthorized access, NMH’s server was verified as having been infected with ransomware.

Upon becoming aware of the incident, NMH immediately shut down its network, and NIPRO has confirmed that the incident did not result in any direct secondary damage to NIPRO or NIPRO Group companies in Japan or overseas.

Manufacturing and product shipping processes have continued unaffected.

NIPRO and NMH are currently taking the necessary measures to restore the NMH network, but no precise timeline is currently available for when restoration will be complete. Because the restoration of business at NMH is the priority, it is expected that investigating the cause and effects of the unauthorized access—including the impact of any potentially leaked information—will take some time.

We sincerely apologize for any inconveniences or concerns this incident may cause customers and other parties involved.

Any impact this incident may have on business performance is also currently being investigated. We will promptly disclose any matters requiring disclosure that arise during the investigation.
